CHAPTER 1 INTRODUCTION

General

The “Edit Rules Documentation” is an integral component of the larger body of documentation about statistical data reported to IBC under the Automobile Statistical Plan, under special Facility Association requirements and under the additional requirements of the Underwriting Information Tracking System (“UITS”). The “Edit Rules Documentation” is a description of all of the edits performed on this data. The purposes of this documentation are:

1. **To assist insurers with error correction:** Users can look up an error code to determine which edit generated the error. On pages describing errors related to Validity edits, users are able to link directly to the relevant Automobile Statistical Plan field codes.
2. **To assist insurers with the design and development of system processes related to the reporting of statistical data:** Users can consult the cross-reference tables to view the Validity edit/error code and Consistency edits/error codes associated with a particular field, as well as a list of other fields affected by the Consistency edits.
3. **To provide specifications regarding edit rules for the design and development of IBC’s processes for editing statistical data:** The “Edit Rules Documentation” describes all of IBC’s processes for editing data reported under the Automobile Statistical Plan, including Underwriting Information Tracking System information.

Edit Types

IBC performs two types of data edits.

Validity Edits

Validity edits ensure that the content of a particular field is valid against a pre-determined list of values or range of values. A Validity edit includes a Context edit, whereby the content of a particular field is checked for its validity in certain standard contexts (e.g., Policy Effective/Accident Date, Jurisdiction, etc.), e.g.

A valid No-Frills Indicator reported in a jurisdiction other than New Brunswick is a Context error, although the field contains a valid value.

Validity edits are developed based on individual Field Code tables in the ASP, with context edits based on the dimensions identified on each Field Code table.

Consistency Edits

Consistency edits ensure that the content of a particular field is valid in relation to the content of other fields in the same record.

These edits may be developed by comparing fields with valid values as well as comparing fields to expected business circumstances.

Editing Sequence

IBC sequences edits to ensure that they are performed as thoroughly as possible. Validity edits, including Context edits, typically precede Consistency edits.

The content of the following key fields must be correct before the editing process can begin:

- Company Number
- Entry Date
- Statistical Plan
- Transaction Type (from which Kind – i.e., Premium/Claim – is derived)
- Statistical Territory (from which Province is derived)

Error Codes

Error codes are assigned in a predefined format that labels them as ASP, UITS or FA errors, as well as Validity or Consistency type errors. Error code formats are further defined in both the “Validity Edits” section and the “Consistency Edits” section.

Standard Characters

Several tables in the “Validity Edits” and “Consistency Edits” sections refer to standard characters, which are as follows:

- A – Z, a – z, 0 – 9, blank, period (.), plus (+), ampersand (&), dollar sign (\$), asterisk (*), dash (–), slash (/), comma (,), percent sign (%), number sign (#), and “at” sign (@).

CHAPTER 2 VALIDITY EDITS

This section contains descriptions of the Validity edits. All allowable values for a field or a portion of a field are indicated.

The error codes are used as page numbers, or page number prefixes where the description of a particular error covers multiple pages. Each error code page contains a hyperlink to the corresponding page of valid values in the Automobile Statistical Plan.

Validity Error Codes

Validity error codes are 5-character codes in the format X999X and with meanings as set out in the table below:

Position	Meaning	Values
1	Type of error	A = ASP field (Validity edit) U = UITS field (Validity edit) F = FA field (Validity edit)
2	Subject area for Validity error codes	1 = Submission control 2 = Policy 3 = Policyholder 4 = Vehicle 5 = Operator 6 = Coverage 7 = Claim detail 8 = Claim participant 9 = Future subject area for Validity edits
3 – 4	Error code number	01 – 99
5	Error code suffix (see additional details below)	V = Value/format error C = Context error

Error code suffix

The error code suffix allows insurers to identify the nature of the error very quickly. The possible suffixes are as follows:

- **V:** Denotes a value/format error; the reported value is not valid for this particular field, or the data is not reported in the required format. For example:
 - A numeric field is reported left justified, when it is supposed to be right-justified.
 - The number of characters is incorrect.
- **C:** Denotes a context error; the value reported is not valid in the appropriate context stipulated in the Automobile Statistical Plan. (Context edits use the standard dimensions/conditions stated in the

Automobile Statistical Plan – i.e., Vehicle Class, Province, Policy Effective Date, Accident Start/Stop Dates).

An additional suffix “x” may be added to the Validity Error Code denoting a value/format soft error; the error relates to a UITS field and is not critical. Although soft errors are not required to be corrected, companies are encouraged to review them and correct them in their internal systems and IBC’s database.

Context Edits

The applicable valid conditions are represented in a table with corresponding valid values; if a table entry for a field under Conditions is blank, it should be read as applying to ALL conditions for that particular field.

A101 – Record Format Version Number

Premium / Claim

[Record Format Version Number](#) is in error due to:

- Value/Format: A101V
- Conditions:

The **Record Format Version Number** must have one of the valid values in the table below with the corresponding conditions, if any, on the same record.

Record Format Version Number	
Values	Conditions

A105 – Transaction Type

Premium / Claim

[Transaction Type](#) is in error due to:

- Value/Format: A105V
- Conditions: A105C

The **Transaction Type** must have one of the valid values in the table below with the corresponding conditions, if any, on the same record.

**** VIN Check Digit algorithm (position 9)**

The following example illustrates the check digit procedure:

POSITION	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
VIN	1	J	4	F	J	6	8	S	8	S	L	6	0	8	4	2	5

PRODUCTS	8	7	24	30	4	18	16	20	0	18	24	42	0	40	16	6	10

- a) assign to each VIN letter, the following numeric value:

A = 1	J = 1	T = 3
B = 2	K = 2	U = 4
C = 3	L = 3	V = 5
D = 4	M = 4	W = 6
E = 5	N = 5	X = 7
F = 6	P = 7	Y = 8
G = 7	R = 9	Z = 9
H = 8	S = 2	

- b) assign a weight factor to each position
 c) multiply weight by value and sum the results
 d) divide the sum by 11
 e) multiply by 11 the fractional portion from the previous step result
 f) check digit = nearest whole value

Note: If the answer is 10, accept "X" as a valid value

* **RIN Check Digit algorithm (position 9)**

The following example illustrates the check digit procedure:

Position	1	2	3	4	5	6	7	8	9
RIN	0	6	7	7	7	2	4	9	7
Weight Factor	3	7	9	10	5	8	4	2	—
Result	0	42	63	70	35	16	16	18	—

- assign a weight factor to each position
- multiply weight by value and sum the results
- divide the sum by 11
- multiply by 11 the whole number, without rounding, from the previous step
- check digit = original sum minus previous step results

Note: If the answer is 10, add 1 to the result of step b and continue with the next steps.

CHAPTER 3 CONSISTENCY EDITS

This section contains descriptions of the Consistency edits – all of the edit rules IBC uses to ensure that the content of a particular field is valid in relation to the content of other fields in the same record.

The error codes are used as page numbers or page number prefixes where the description of a particular error covers multiple pages.

Consistency Error Codes

Consistency error codes are 5-character codes in the format X9999 and with meanings as set out in the table below:

Position	Meaning	Values
1	Type of error	B = ASP field (Consistency edit) C = UITS field (Consistency edit) D = FA field (Consistency edit)
2	Defaults to '9' on Consistency error codes	9 = Used for Consistency edits
3 – 5	Error code number	001 – 999

A suffix "x" may be added to the Consistency Error Code denoting a soft error; the error relates to a UITS field and is not critical. Although soft errors are not required to be corrected, companies are encouraged to review them and correct them in their internal systems and IBC's database.

B9013 – Type of Use vs. Third Party Liability Coverage Code or Third Party Liability BI Coverage Code or Claim Coverage Code

Premium / Claim

Lessors' Contingent Liability Policy cannot have Excess Liability Coverage.

Edit Procedure

If **Type of Use** has the value shown in the table below, then the **Coverages** listed in the table must have the corresponding values.

Type of Use	Coverage	Values
92	Third Party Liability Coverage Code AND Third Party Liability BI Coverage Code	NOT = 69
	Claim Coverage Code	

B9014 – Entry Date vs. Policy Effective Date

Premium

Policies can be reported with **Policy Effective Date** 27 months in advance of **Entry Date** for advance renewals/new policies and multi-year policies.

Edit Procedure

Entry Date and **Policy Effective Date** must have the corresponding values shown in the table below.

Entry Date	Policy Effective Date (CCYYMMDD)
CCYYMM	≤ Entry Date plus 27 months

B9015 – Transaction Type vs. Entry date, Endorsement/Cancellation Date

Premium

Endorsements/Cancellations can be reported with **Endorsement/Cancellation Dates** 36 months in advance of **Entry Dates** for advance renewals/new policies and multi-year policies.

Edit Procedure

If **Transaction Type** has one of the values shown in the table below then **Entry Date** and **Endorsement/Cancellation Date** must have the corresponding values in the table.

Transaction Type	Entry Date	Endorsement/Cancellation Date (CCYYMMDD)
2, 4, J, K, L, M	CCYYMM	≤ Entry Date plus 36 months

B9016 – Policy Effective Date vs. Policy Expiry Date

Premium

Premium transactions can only be reported with a maximum 12 months calculated as the difference between **Policy Effective Date** and **Policy Expiry Date**.

Edit Procedure

Policy Effective Date and **Policy Expiry Date** must have the corresponding values shown in the table below.

Policy Effective Date	Policy Expiry Date
CCYYMMDD	\geq Policy Effective Date AND \leq Policy Effective Date plus 12 months

B9017 – Transaction Type vs. Policy Effective Date, Policy Expiry Date, Endorsement/Cancellation Date

Premium

Endorsements/Cancellations can only be reported within the policy term.

Edit Procedure

If **Transaction Type** has one of the values shown in the table below, then **Policy Effective Date**, **Policy Expiry Date** and **Endorsement/Cancellation Date**, must have the corresponding values in the table.

Transaction Type	Policy Effective Date	Policy Expiry Date	Endorsement/Cancellation Date (CCYYMMDD)
2, 4, J, K, L, M	CCYYMMDD	CCYYMMDD	\geq Policy Effective Date AND \leq Policy Expiry Date
1, 3			Blank OR = Policy Effective Date

B9018 – Entry Date vs. Policy Effective Date

Claim

Policy Effective Date cannot be greater than **Entry Date**, for a Claim transaction.

Edit Procedure

Entry Date and **Policy Effective Date** must have the corresponding values shown in the table below.

Entry Date	Policy Effective Date (CCYYMMDD)
CCYYMM	≤ Entry Date

B9019 – Policy Effective Date vs. Accident Date

Claim

Accident Date cannot be less than the **Policy Effective Date** and must not be greater than **Policy Effective Date + 12 months** (i.e. within policy term).

Edit Procedure

Policy Effective Date and **Accident Date** must have the corresponding values in the table below.

Policy Effective Date	Accident Date (CCYYMMDD)
CCYYMMDD	≥ Policy Effective Date AND ≤ Policy Effective Date plus 12 months

B9020 – Policy Effective Date, Endorsement/Cancellation Date vs. Vehicle Model Year

Premium / Claim

Vehicle Model Year can be reported 2 years in advance of **Policy Effective Year** or **Endorsement/Cancellation Year** for Premium transactions and 3 years for Claim transactions.

Edit Procedure

For Premium transactions: **Policy Effective Date**, **Endorsement/Cancellation Date** and **Vehicle Model Year** must have the corresponding values shown in the table below.

Policy Effective Date (Year)	Endorsement/Cancellation Date	Vehicle Model Year (CCYY)
CCYYMMDD	Blank	\leq Policy Effective Date plus 2 years
	CCYYMMDD	\leq Endorsement/Cancellation Date plus 2 years

For Claim transactions: **Policy Effective Date (Year)** and **Vehicle Model Year** must have the corresponding values shown in the table below.

Policy Effective Date (Year)	Vehicle Model Year
CCYYMMDD	\leq Policy Effective Date plus 3 years

B9021 – Type of Business, Endorsement/Cancellation Date vs. Exposure

Premium

For individually rated: **Exposure** must equal the calculated difference in months between **Policy Effective Date** or **Endorsement/Cancellation Date AND Policy Expiry Date +/-1**.

For fleet: **Exposure** must be wholly divisible (i.e. no remainder) by the difference in months between the **Policy Effective Date** or **Endorsement/Cancellation Date AND Policy Expiry Date +/-1**.

For minor premium adjustments (Transaction Type 4 or M) **Exposure** must be zero.

Edit Procedure

For individually rated: If **Type of Business**, **Transaction Type** and **Endorsement/Cancellation Date** have the values shown in Table 1 below, then **Exposure** must have one of the corresponding values in the table.

For fleet rated: If **Type of Business**, **Transaction Type** and **Endorsement/Cancellation Date** have the values shown in Table 2, then **Exposure** must have one of the corresponding values in the table.

Table 1

Note: * Refer to Appendix A – Edit tags for determination of **<Attached Trailer>** and **<Third Party Excess Liability Coverage>**.

B9029 – Number of Years Claims Free vs. Number of Claims

Premium / Claim

If the Rated Operator has had no claims for the past 7 years, the **Number of Claims** must be 0.

Edit Procedure

If **Number of Years Claims Free** has the value shown in the table below, then **Number of Claims** must have the corresponding value in the table.

Number of Years Claims Free	Number of Claims
≥ 07	0

B9030 – Rated Operator Number of Years Licensed vs. Rated Operator Driver Training

Premium / Claim

If **Rated Operator Number of Years Licensed** ≤ 2 , **Rated Operator Driver Training** must be 0 or 1. If **Rated Operator Number of Years Licensed** > 2 , **Rated Operator Driver Training** must be 9.

Edit Procedure

If **Rated Operator Number of Years Licensed** has the value shown in the table below, then **Rated Operator Driver Training** must have one of the corresponding values in the table.

Rated Operator Number of Years Licensed	Rated Operator Driver Training
≤ 02	0, 1
> 02	9

B9031 – Number of Other Operators vs. Other Operators Number of Years Licensed

Premium / Claim

If there are no other Operators for the vehicle, **Number of Other Operators** must be 6 (i.e. none) and **Other Operators Number of Years Licensed** must be blank.

Edit Procedure

If **Number of Other Operators** has the value shown in the table below, then **Other Operators Number of Years Licensed** must have the corresponding value in the table.

Number of Other Operators	Other Operators Number of Years Licensed
6	Blank
< 6	≥ 0

B9032 – Type of Use vs. Kind of Loss

Claim

Loss Transfer (i.e. **Kind of Loss** 07) cannot be reported with Motorcycles, ATV or Snow vehicles **Type of Use** codes.

Edit Procedure

If **Type of Use** has the value shown in the table below, then **Kind of Loss** must have the corresponding value in the table.

Type of Use	Kind of Loss
21 – 24, 26, 31, 32, 50, 56, 57	NOT = 07

B9033 – Kind of Loss vs. First Party Vehicle Total Loss Indicator

Claim

The **First Party Vehicle Total Loss Indicator** must be T, if **Kind of Loss** indicates Total Loss (i.e. 12), for other physical damage **Kind of Loss** codes it can be either T or P with the exception of Kind of Loss 38 or 39 that could be T, P or Blank.

Edit Procedure

If **Kind of Loss** has the value shown in the table below, then **First Party Vehicle Total Loss Indicator** must have the corresponding value in the table.

Kind of Loss	Accident Date	First Party Vehicle Total Loss Indicator
12	≥ 19960701	T
16, 20 – 29		T, P
38, 39		T, P, Blank, Z
NOT = 12, 16, 20 – 29, 38, 39		Blank, Z

B9034 – Policy Effective Date vs. Type of Use (PPV), Attached Trailer, Third Party Excess Liability Coverage, Vehicle Code and Vehicle Model Year

Premium / Claim

Vehicle Model Year must be consistent with **Vehicle Code** according to IBC table of valid Vehicle Codes for Private Passenger Vehicles, other than attached trailers and Third Party Excess Liability coverage.

Edit Procedure

If **Policy Effective Date**, **Type of Use**, **<Attached Trailer>**, and **<Third Party Excess Liability Coverage>** have the value shown in the table below, then **Vehicle Code** and **Vehicle Model Year** must have the corresponding values in the table.

Policy Effective Date	Type of Use	<Attached Trailer>*	<Third Party Excess Liability Coverage>*	Vehicle Code & Vehicle Model Year
≥ 19831201	01 – 03, 05 – 13, 18, 19	No	No	Valid combination found in the PPV table

Note: * Refer to Appendix A – Edit tags for determination of **<Attached Trailer>** and **<Third Party Excess Liability Coverage>**.

B9035 – Policy Effective Date vs. Type of Use (Other PPV), Attached Trailer, Third Party Excess Liability Coverage, Vehicle Code and Vehicle Model Year

Premium / Claim

Vehicle Model Year must be consistent with **Vehicle Code** according to IBC table of valid Vehicle Codes for other Personal Use vehicles (i.e. motorcycles, snowmobile, ATVs), other than attached trailers and Third Party Excess Liability coverage.

Edit Procedure

If **Policy Effective Date**, **Type of Use**, **<Attached Trailer>** and **<Third Party Excess Liability Coverage>** have the values shown in the table below, then **Vehicle Code** and **Vehicle Model Year** together must have the corresponding value in the table.

Policy Effective Date	Type of Use	<Attached Trailer >*	<Third Party Excess Liability Coverage>*	Vehicle Code & Vehicle Model Year
≥ 19970101	21 – 24	No	No	Valid combination found in Motorcycle table
≥ 20011001	26			Valid combination found in ATV table
	50			Valid combination found in Snowmobile table

Note: * Refer to Appendix A – Edit tags for determination of **<Attached Trailer>** and **<Third Party Excess Liability Coverage>**.

B9036 – Claim Count vs. Loss Amount

Claim

Claim transactions reported with a **Claim Count** of 1 must have a **Loss Amount** greater than 0.

Edit Procedure

If **Claim Count** has the value shown in the table below, then **Loss Amount** must have the corresponding value in the table.

Claim Count	Loss Amount
1	> 0

B9037 – Statistical Territory vs. Vehicle Location Postal Code (FSA)

Premium / Claim

Vehicle Location Postal Code (FSA) must be consistent with the province / territory derived from **Statistical Territory**.

Edit Procedure

If **Statistical Territory (Province)** has the value shown in the table below, then **Vehicle Location Postal Code** must have one of the corresponding values in the table.

Statistical Territory (Province)	Vehicle Location Postal Code (FSA)
Valid Canadian Statistical Territory	First three characters of a Postal Code that is valid for the Province derived from the Statistical Territory .

B9038 – Policy Effective Date vs. Trailer Indicator, Premium Amounts and Third Party Liability Driving Record

Premium

Third Party Liability Driving Record must be reported if Third Party Liability Premium, Third Party Liability BI Premium, Third Party Liability PD Premium or DCPD Premium is present, except for attached trailer

Edit Procedure

If Policy Effective Date, Trailer Indicator, Third Party Liability Premium, Third Party Liability BI Premium, Third Party Liability PD Premium, DCPD Premium and Type of Business have the value shown in the table below, then Third Party Liability Driving Record must have one of the corresponding values in the table.

C9029 – Attached Trailer and Third Party Excess Liability Coverage vs. Vehicle Identification Number - VIN or First Party Vehicle Identification Number and Vehicle Code/Vehicle Model Year

Premium / Claim

VIN must be consistent with **Vehicle Code** and **Vehicle Model Year** except for attached trailers and Third Party Excess Liability coverage and “incomplete vehicles”.

Edit Procedure

If **<Attached Trailer>**, **<Third Party Excess Liability Coverage>** and **Vehicle Identification Number – VIN** for premium transactions or **First Party Vehicle Identification Number** for claim transactions have the values shown in the table below, then **Vehicle Code** and **Vehicle Model Year** must have the corresponding value in the table.

<Attached Trailer>*	<Third Party Excess Liability Coverage>*	Vehicle Identification Number–VIN (UITS) First Party Vehicle Identification Number (UITS)	Vehicle Code/Vehicle Model Year
No	No	Valid VIN	Vehicle Code/Vehicle Model Year matches corresponding VIN in VINlink database

Note: * Refer to Appendix A – Edit tags for determination of **<Attached Trailer>** and **<Third Party Excess Liability Coverage>**.

Note: This error code is assigned as follows:

- C9029 for:
 - Ontario Private Passenger vehicles with Policy Effective Date \geq 20020301, and for Private Passenger vehicles in other jurisdictions with Policy Effective Date \geq 20090101.
 - Motorcycles, ATVs and Snow vehicles in all jurisdictions with Policy Effective Date \geq 20100101
- C9029x for:
 - Ontario Private Passenger vehicles with Policy Effective Date $<$ 20020301,
 - Private passenger vehicles for other jurisdictions than Ontario with Policy Effective Date $<$ 20090101
 - Motorcycles, ATV and Snowmobile Vehicles in all jurisdictions with Policy Effective Dates $<$ 20100101.

C9030 – Attached Trailer and Third Party Excess Liability Coverage vs. Vehicle Identification Number-VIN or First Party Vehicle Identification Number

Premium / Claim

VIN must be found in the VINlink database except for attached trailers and Third Party Excess Liability coverage.

Edit Procedure

If **<Attached Trailer>** and **<Third Party Excess Liability Coverage>** have the values shown in the table below, then **Vehicle Identification Number – VIN** for premium transactions or **First Party Vehicle Identification Number** for claim transactions must have the corresponding value in the table.

<Attached Trailer>*	<Third Party Excess Liability Coverage>*	Vehicle Identification Number–VIN (UTS) First Party Vehicle Identification Number (UTS)
No	No	Valid VIN matches corresponding entry in VINLink Database

Note: * Refer to Appendix A – Edit tags for determination of **<Attached Trailer>** and **<Third Party Excess Liability Coverage>**.

Note: Error code is assigned as follows:

- C9030 for:
 - Ontario Private Passenger vehicles with Policy Effective Date \geq 20020301 and for Private Passenger Vehicles in other jurisdictions with Policy Effective Date \geq 20090101.
 - Motorcycles, ATVs and Snow vehicles in all jurisdictions with Policy Effective Date \geq 20100101
- C9030x for:
 - Ontario Private Passenger vehicles with Policy Effective Date $<$ 2002030,
 - Private Passenger Vehicles for other Jurisdictions than Ontario with Policy Effective Date $<$ 20090101
 - Motorcycles, ATV and Snowmobile Vehicles in all jurisdictions with Policy Effective dates $<$ 20100101.

C9031 – Type of Business vs. Vehicle Identification Number–VIN, Exposure and Vehicle Indicator

Premium

For Fleet Rated policies reported with **VIN**, **Exposure** must be ≤ 12 and **Vehicle Indicator** must be 001 – 899.

Edit Procedure

If **Type of Business** and **Vehicle Identification Number – VIN** and **<Attached Trailer>** have the values shown in the table below, then **Exposure** and **Vehicle Indicator** must have the corresponding values in the table.

Type of Business	Vehicle Identification Number – VIN (UITS)	<Attached Trailer>*	Exposure	Vehicle Indicator (UITS)
4, 5	NOT = NOT APPLICABLE	No	≤ 12	001 – 899
		Yes		000

Note: Refer to Appendix A – Edit tags for determination of **<Attached Trailer>**.

C9032 – Third Party Liability Coverage Code or Third Party Liability BI Coverage Code vs. Vehicle Identification Number–VIN

Premium

Transactions reported with **Third Party Excess Liability Coverage** do not require **Vehicle Identification Number – VIN**.

Edit Procedure

If **Third Party Liability Coverage Code or Third Party Liability BI Coverage Code** has the value shown in the table below, then **Vehicle Identification Number – VIN** must have the corresponding value in the table.

Third Party Liability Coverage Code or Third Party Liability BI Coverage Code	Vehicle Identification Number – VIN (UITs)
69	NOT APPLICABLE

Note: Refer to Appendix A – Edit tags for determination of <Attached Trailer>.

APPENDIX A EDIT TAGS

Determination of Attached Trailer

Attached trailer is identified as driving record 7 on transactions with Policy Effective Date < 20080101 and use of Trailer Indicator on transactions with Policy Effective Dates \geq 20080101.

Edit Procedure

If **Policy Effective Date**, **Trailer Indicator** and, **Driving Record** fields have the value shown in the table below, then **Attached Trailer** has the value shown in the table

Policy Effective Date	Trailer Indicator	Driving Records*	Attached Trailer
< 20080101		7	Yes
		NOT = 7	No
\geq 20080101	Y		Yes
	N		No
	Blank		No

*Driving Records:

- Accident Benefits Driving Record
- Collision/All Perils Driving Record
- Third Party Liability Driving Record
- Claim Driving Record

Determination of Third Party Excess Liability Coverage

Third Party Excess Liability Coverage is identified as coverage code 69 reported as a Third Party Liability Coverage code.

Edit Procedure

If **Third Party Liability Coverage**, or **Third Party Liability BI Coverage** or **Claim Coverage** has the value shown in the table below, then **Third Party Excess Liability Coverage** has the value shown in the table.

Third Party Liability Coverage	Third Party Liability BI Coverage	Claim Coverage	Third Party Excess Liability Coverage
69	69	69	Yes
NOT = 69	NOT = 69	NOT = 69	No
